

Future Food Trends:

CSR Cocktails

Fri. November 10
14.00-16.00

Axelborg, Axeltorv 1,
1609 KBH V

You are invited

Join NEPCon for an informal afternoon of information sharing, networking and cocktails – the event is completely free! We would like to share our experiences from the three-year DANIDA project [Responsible Sourcing of Soy, Cattle and Palm Oil](#), including project highlights and lessons learned through a mixture of short presentations and picture exhibit.

14:00-14:15	Welcome and introductions // by Christian Sloth NEPCon Responsible Source Programme Manager
14:15-14:45	NEPCon Project highlights and introduction to the NEPCon Sourcing Hub
	<ul style="list-style-type: none"> • Our innovative approach to analysing risks in the supply chains for palm oil, soy and beef, based on our experience in the timber sector. • Our national risk assessments for 10 key producer countries of soy, beef and palm oil, covering 82% of global palm oil production, 52% of global soy production and 16% of global beef production. The national risk assessments detail the risks of negative impact to environment and people in a producer country, and give options to companies sourcing from these places to treat the risks. • Our 28 detailed responsible sourcing tools from the national risk assessments that make the information directly applicable to companies' supply chains. • The NEPCon Sourcing Hub, where all the risk assessments and tools can be downloaded for free. • Our experiences working with four large food companies sourcing palm oil, soy and beef and helped them analyse a selected supply chain scope for risks.
14:45-16:00	Open floor for information sharing, questions and networking.

Participants will be encouraged to share their work in these sectors so we can build synergies and learn from each other's work.

Sign up [here](#) – the event is free! We look forward to seeing anyone interested in the field responsible sourcing of palm oil, soy and beef. Feel free to share with you network and bring your colleagues. Don't hesitate to contact us with further question at drb@nepcon.org.

Meet

Christian Sloth, Forest Legality Programme Manager NEPCon

Christian has more than 10 years' experience in wood products, timber legality and natural resource project management. He has expert knowledge and experience in management of legality verification programs, development of standards and procedures, forest legality verification, and risk assessments. He has participated extensively in the EU stakeholder process on the development of EUTR Due Diligence Requirements. He has global working experience in many countries, especially in Europe and Asia. Christian has MSc in Land Use in Developing Countries and MSc in Agroforestry.

Alexandra Banks, Senior Forest Legality Specialist NEPCon

Alexandra has several years of experience on international forest policy and international trade regulation. Over the last 3.5 years Alexandra has worked with NEPCon LegalSource clients and legality projects. Alexandra has extensive project experience in the Asia-Pacific, in particular Vietnam, Malaysia and Indonesia. Working in particular on projects related to legality, Alexandra applies her legal and technical background to a number of NEPCon areas.

Gustaf Bock, Chefkonsulent, SEGES

Gustaf Bock uses his competencies when working with business development for food companies and food manufacturers that focuses on product innovation and value added.

As an expert in strategy and business development, Gustaf's main competence is mapping the client's challenges and needs. He does this by helping them to prioritise between the client's different strategic focus areas, put in place the right team of food experts and by creating the necessary settings to promote the innovative agenda.
